# Connect and Print Over TCP/IP with Apple® iOS – Link-OS™ SDK – Objective-C

This sample application demonstrates how to use the Link-OS SDK™ to connect an Apple® mobile device to a Zebra printer via TCP/IP and print a sample label.

The application was developed using Xcode 3.2.4 on Mac OS X 10.6.5 using the Link-OS SDK.

Note: This application is provided AS-IS, for example purposes only.

For more information on developing Apple solutions, Getting Started with Apple® iOS Development – Link-OS™ SDK – Objective-C.
